DETAILED ACTION

1. Claims 1-11 are presented for examination.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6732162. Initially, it is noted that the instant application is a continuation of Application No. 09/440461, which results in Patent No. 6732162. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claims emphasis on the invention of providing a means for multiple multimedia originators to upload media objects (e.g.,

images) and having the objects processed and distributed to a plurality of websites so that each of the plurality of websites is tailored to a customized viewing need. Claim 1 of the instant application uses the broader term “media objects” to replace the “images” in claim 1 of Patent No. 6732162. However, such difference does not make it patentably distinct from the already patented claim.

2. As to claims 2-4 and 11, since they are also fully disclosed in application No. 09/440461, they are therefore rejected as non-statutory double patenting as set forth in the paragraphs herein above.

3. Applicant is reminded to update the application status shown in the first paragraph of the specification.

4. Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

5. Claim 4 is objected to because of the following informalities:

(i) As to claim 4, line 3, the phrase “the processed the one or more ...” appears to be a typo of “the processed one or more ...”.

Correction/clarification is required.

6. Claims 1-4 and 11 would be allowable if rewritten/amended or file a terminal disclaimer to overcome the double patenting rejection and the objection set forth in this Office Action.
